<G>.. I get a kick out of this... " To protect your digital security, we strongly recommend deleting any messages or screenshots containing your personal details. As a reminder, Robinhood will never ask you for this information over social media.

3:45 PM "...

I've been network and server security since the old Novell 80286 days over a bank of servers, including HP-UX and Microsoft NY domain controllers and also our AT&T Definity G3 facility switch with Audix and all the Cisco devices connecting our production locations in Ohio LANs to the corporate WANs.

I even have a full time packet sniffer (Kali Linux with Wireshark) on my own home network collecting information as well.

I also have our web server running as a background service on this workstation and never even know it.

Yeah, last I looked , my money was still being held hostage by your systems... and I have had many people tell me they will never deal with a system like that on may of the sites I publish on constantly during the day.

I also made screen shots of all the information in this chat session and shared that with my mentor and our customer service, also very disgusted with the support we are dealing with on this issue... they'll keep other workers from using your site just from what they have experienced professionally.

I just got out of my Epsom salt bath for my muscle and nerve damage... I told you that was where I was. I'll check your link out.... It is about time somebody did something, it has been since Thanksgiving and you almost killed me without that money.

I did everything you asked of me and you extended the 'restriction' ...not only that, your system STOLE MY MONEY, CHARGING ME (Fee: \$28.74) FOR TRANSACTIONS YOUR OWN SYSTEM STOPPED, NOT MY FAULT !!!!! YOURS !!!!! ...

In the mean time, I have installed and used about 10 other systems much better than this thing, I just want my money out and I am gone for good.

Here is what I just got in my email today from your useless system....

Click on that <https://x.com/messages/media/1867369631792738530>

And start a conversation with them now

Do you get that?

Sure, some junk AI telling me to wait again.... I'm still waiting, as normal with your system anymore. Today Hello! Can I help you? I was told by Robinhood Support on <http://X.com> to come here Thanks

Go back to them now,you will get a response

Good thing I replicate EVERYTHING IN THESECHATS INTO A WORD PROCESING DOC.

Make sure you stay active with them and follow the instructions

Follow the processing procedures and stay active with them,you have my words your issue will be solve out

This is what you have to get done from your back end ? I'll walk you through the process ? To perform this action you will need to sync an external DeFi wallet to your account ? I already did what your system told me to do to get the restriction removed and you extended it instead. YOU KNOW WHO I AM AND WHAT I WANT, I AM DONE PLAYING YOUR IGNORANT GAMES. NO, I am not installing some damn wallet. that was not in any literature about working with this system, I just want my funds returned to my credit union... PERIOD.

Is this your idea of a SICK JOKE ??? NO, Iam not using some stupid wallet for what I do, I do not use these pieces ofshit enough to care about whatever a wallet is and could care less. heer was nothing that said we had to use a wallet when you took our funds.

Please calm down,they just to synchronize it,to get your funds back to you,you need to follow the instructions to ensure your issue got solve out

I'm not using another piece of software to do a damn thing with this piece of shit.. ' calm down'... MY ASS ! YOUR SYSTEM HAS A TRANSFER PROGRAM ALREADY TO SEND MY FUNDS BACK THE SAME DAMN WAY THEY CAME IN... THRU THIS SYSTEM.

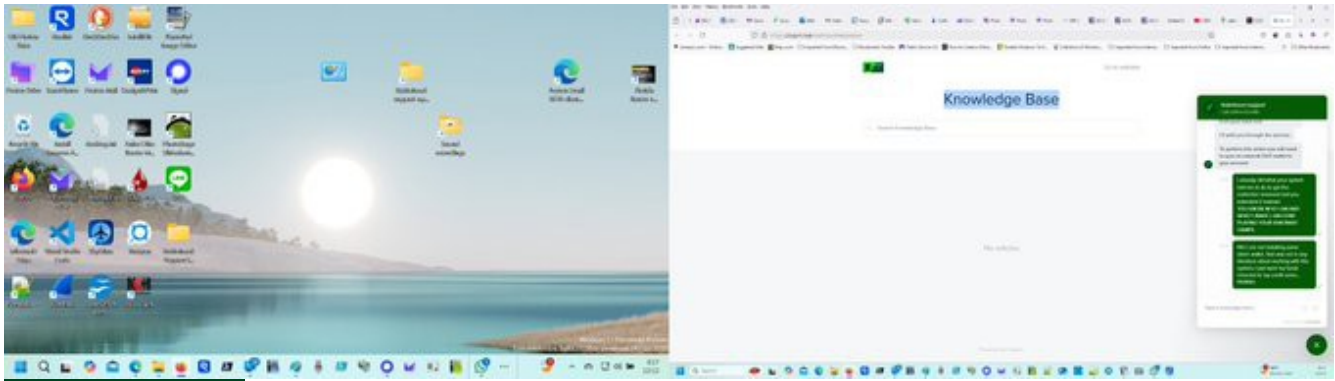

YOU DIDN'T ABOUT STARVE AND HAD BILLS BOUNCE BECAUSE OF THIS BULLSHIT !

We're sorry for the inconvenience

your AI associate quit responding, enable my transferso I can get my money back, I'll bill you for the theft ofmy funds

What was the last conversation?

Kindly send me the screenshot

Edited

You system has locked my \$1700 into it since Thanksgiving. I am 65, disabled, on SSD, retired and a veteran. I did not come to this site to get my money stolen. Your site has repeatedly stole \$28.74 for a transaction fee THAT NEVER HAPPENED BECAUSE YOU OWN SYSTEM STOPPED IT.

I want my funds out of this place and I will never be back.

Sincere apology for the inconvenience...

You will need to re authenticate and validate your account via a rectification process

Do you have an idea how much I make a month on my SSD?... 2400 a month, it was the end of the month and I needed to pay a bill, your system stopped that and held \$1700 in there and I had to borrow money from my credit union to survive because of this useless AI support structure. I used to be the LEAD IT Analyst for a United Technologies Automotive assembly plant and this

system disgusts me.

You will need to re authenticate and validate your account via a rectification process

I already uploaded the documents requested from my Credit Union, copies front and back of my drivers license, a video of my face, turn left, turn right.

Your own transfer routine went through that and gave a green check and then failed to transfer because of a restriction and again charged me for a fee that never happened.

I just want my money returned ASAP. I am done with this trash

This is what you have to get done from your back end

I'll walk you through the process

To perform this action you will need to sync an external DeFi wallet to your account

I already did what your system told me to do to get the restriction removed and you extended it instead. YOU KNOW WHO I AM AND WHAT I WANT, I AM DONE PLAYING YOUR IGNORANT GAMES.

NO, I am not installing some damn wallet. that was not in any literature about working with this system, I just want my funds returned to my credit union... PERIOD.

Them) - <https://x.com/SupportSer31817>

Once you're ready to follow the instructions just get back to me

I am about to publish all three of your ' support groups on X statements I have replicated to a large word processing document, complete with ' screen shots ' of your EXTORTION ATTEMPTS all over the realms of the United States Minutemen - American Patriots Coalition

USMM-APC - Internet locations - <https://gab.com/groups/81087>

Robert Gamble - Disabled IT Analyst/Communication Systems Engineer & Automation Test, Control and Design Systems Engineer, 82nd Airborne Artillery (1977), National Admin for the United States Minutemen - American Patriots Coalition, Service Officer for the Newton American Legion, East Fultonham, Ohio and LEAD on the Nextdoor.com (Brevard County Malabar Region, Palm Bay, Florida) Community Social Media site

You just ask YOUR BOSSES if this is really worth it anymore.

I want my funds TODAY BEFORE NOON or I will let the entire world know of this treachery with a senior citizen of Florida, on SSD and also a veteran.

You thieves have held it hostage and continue to strip it of the original value TOO DAMN LONG ALREADY !!!

(them) Dec 13 2024 3:55 PM EST

Go back to our live chat support so your issue can be solved

(me) Dec 13 2024 6:29 PM EST

I tried your ' trust wallet '.. it wanted access to everything in my Google Drive.

NO WAY !!!!
